Conflict Mineral Materials Policy

On August 22, 2012, the U.S Security and Exchange Commission (SEC) issued the final conflict mineral rule, which requires publicity companies that entering goods into the U.S., to report annually the presence of conflict minerals (tin, tungsten, tantalum and gold – "3TG") originated in the Democratic Republic of Congo or adjoining counties ("Covered Countries").

Micronet is committed to source components & raw materials from suppliers\manufactures that respect human rights, ethics and environmental savings. Micronet demands from all our suppliers to comply and share with our commitment policy in order to control the supply chain.

Under this policy, we monitor and ensure the following:

a. Buy & use raw materials & components from world leading manufactures or their global worldwide distributors that respect conflict mineral rule and the sourced goods did not contain directly or indirectly conflict mineral materials ("3TG").

b. Receive from our suppliers a complete conflict mineral materials declaration (preferred CMRT format) which contains legal "3TG" material sources.

c. We will reconsider further relationships with suppliers that did not respect our policy.

d. Assist our customers to implement their own conflict mineral program.
